

Appl. No. : **09/945,311**
Filed : **August 30, 2001**

AMENDMENTS TO THE SPECIFICATION

Please amend the specification as follows:

[0107] With reference now to Figure 12b, the alarm system 66 is shown mounted to the ECU 28. As illustrated, the alarm system 66 advantageously is a stand-alone unit that allows the alarm system 66 to be a conveniently installed option in factory prepared motorcycles. The alarm system 66 includes the power circuit ~~72~~78, the alarm device 62 and the vibration detection circuit ~~78~~72. In some arrangements, the capacitor circuit 74 can be included within the alarm system 66 as well.
